

FORMER WHIRLPOOL PARK SITE ASSESSMENT

- Testing found no health risk and no evidence of hazardous illegal dumping
- 328 sub-surface samples were tested for 232 chemical compounds
- No PCBs detected in ground water, wells, or pool filters
- PCBs above 1ppm found only in fill material in a limited area

LEGEND

- Property Line
- Dry Pond/Pool
- Fill Dirt and Adjacent Area
- Former Grist Mill and Adjacent Area
- Sample Location
- Total PCBs Not Detected or < 1 ppm*
- Total PCBs Between 1 and 49 ppm†
- Total PCBs > 50 ppm

* 1 part per million is EPA's residential level for PCBs.

† 50 parts per million defines when a material, at or above that number, must be handled and disposed of as a PCB waste.
