CREATING DEMAND AND EARNING TRUST EVERY DAY THROUGHOUT THE WORLD

2014 Annual Report

Please visit our online annual report at WhirlpoolCorp.com/2014Annual/
We are the #1 major appliance manufacturer in the world, with approximately $20 billion in annual sales, 100,000 employees and 70 manufacturing and technology research centers throughout the world in 2014. The company markets Whirlpool, KitchenAid, Consul, Maytag, Brastemp, Amana, Bauknecht, Jenn-Air, Indesit and other major brand names in more than 170 countries.

In 2014, Whirlpool Corporation introduced an all-new innovative top-load laundry lineup. The Whirlpool brand Cabrio delivers incredible wash action and complementary drying capabilities that delight consumers and retailers alike.
Chairman’s Message

During the year, we completed two very important acquisitions that contributed to our record results in 2014 and create an even larger platform for growth in the future. Our investments in our brands and products generated more than 70 new product launches that have set the stage for future years of margin expansion. We effectively managed through volatility and headwinds in emerging markets and continued our focus on driving benefits through ongoing cost productivity programs.

As a result, we created value for our shareholders as our stock finished the year at an all-time high in December and over the last three years, total shareholder return was 335 percent. We increased quarterly dividends on the company’s common stock by 20 percent and repurchased $25 million of shares under the current share repurchase program that has $475 million in authorized funds remaining.

NEW GLOBAL GROWTH PLATFORM

As we turn the page to 2015, we expect to be an even larger global branded consumer products company with substantial earnings and free cash flow growth. We have a fundamentally different platform for growth than we did a decade ago with four value creating regions, seven brands that generate more than $1 billion in revenue, truly global earnings diversification and unprecedented global scale. We are now No.1 in North America, Europe, and Latin America, and the No.1 Western Company in Asia.

At our Investor Day in December, we laid out strong value creation targets through 2018 as we continue to grow our core appliance business, expand our adjacent businesses and drive acquisition cost synergies of nearly $400 million, resulting in:

• Growing revenues by more than 30%
• Doubling ongoing EPS to $22–$24 per diluted share
• Doubling free cash flow to $1.3–$1.6 billion

MULTIPLE PATHS TO PROFITABLE GROWTH AND MARGIN EXPANSION

Our acquisitions provide us with outstanding opportunities for geographic growth and transformation in Europe and Asia, creating substantial sources of value creation and diversification of our earnings profile. Additionally, we have opportunities for growth as demand in the U.S. continues to recover and we are well-positioned to capitalize when growth returns to emerging markets such as Brazil, China and India.

In 2014, we invested more than $700 million in capital expenditures and will continue accelerating our investments in relevant technologies and products that benefit our consumers. We are also driving revenue growth in areas that expand and extend beyond our core appliance business, and by leveraging our core infrastructure we will continue to grow in these higher margin categories.

We also have a significant opportunity to create value with what we believe is the best global cost structure in the industry. We will continue to drive ongoing cost productivity programs, leverage a right-sized fixed cost structure with volume growth, and reduce complexity through high volume global platforms. As a result of these opportunities, we are expecting revenue growth and margin expansion in every region.

STRATEGIC ARCHITECTURE

These multiple opportunities for growth support our vision to be the best branded consumer products company in every home around the world. We leverage four strategic planks as we strive to create demand and earn trust with our consumers every day. The first two planks focus on “what” we do to fulfill that mission. First, we have to bring great product leadership to the market every day, driving innovation in ways that matter to consumers. That’s our economic engine.

Second, we have to continue to invest in our great brands that help us to create demand as each brand connects with our consumers in a unique way tailored toward their preferences.

In addition to understanding “what” we do, we must also focus on “how” we fulfill that mission. The third and fourth planks address just that. We drive operating excellence in every part of our business — from design and manufacturing to selling, shipping and servicing — as we implement the best practices from around the world to ensure we are getting better each and every day. And last, but probably most important, is people excellence. We invest in our people just as we invest in our products and have created a great global employee team. Operating with

2014 RESULTS

2014 was a milestone year for Whirlpool Corporation as we delivered record results, created strong shareholder value and built an exceptional platform for growth and margin expansion for 2015 and beyond.

• Record revenue of $19.9 billion
• Record EPS of $11.39
  (ongoing business earnings per diluted share)
• Strong cash generation of $854 million
  (free cash flow)
our core values under these four strategic planks is what differentiates Whirlpool Corporation as the best branded consumer products company.

2015 OUTLOOK

The global environment in which we operate continues to be volatile with emerging market challenges in China and Brazil, volatile demand in Russia and Eastern Europe, currency devaluation in key markets and changing raw materials costs. However, the key to our success in this type of environment is a proactive management approach to delivering on our commitments while managing this volatility.

This approach includes a continual emphasis on cost productivity, restructuring programs that lower fixed costs, new product introductions that drive improved price-mix and, as appropriate, cost-based price increases to offset inflationary headwinds. By focusing on what we can control and meeting the challenges we face, Whirlpool can continue to thrive in these environments.

This year, we are focused on successfully integrating our businesses in Europe and Asia and fully leveraging our new, expanded global platform to create shareholder value. With continued investments in our brands and a very strong lineup of innovative products, both in our core appliances and in our adjacent businesses, we are well-positioned to capitalize on improving demand trends. And we continue to drive benefits through ongoing cost productivity programs.

We are on track for another record year of business operating performance, we’re continuing to build a great global platform for future growth, and we’ll continue to balance funding for all aspects of our business to ensure the best long-term value creation for our shareholders.

Jeff M. Fettig
Chairman of the Board and Chief Executive Officer
E. N/A

**Whirlpool Corporation is committed to providing the best branded consumer products to every home throughout the world. With two acquisitions in 2014, Whirlpool Corporation became more geographically diverse. In Europe, Middle East and Africa (EMEA), the Indesit Company brought several new brands to Whirlpool Corporation — including Indesit and Hotpoint.** In Asia, we added Diqua and Royalstar brands as a result of the acquisition of Hefei Sanyo. We consider ourselves a global collection of small communities. We leverage our broad scale but rely on individual regions to personalize products to meet our consumers’ needs. It’s how we introduce exciting innovations again and again — more than 70 new product launches in 2014 alone — across all of our brands.

Whirlpool Corporation is the **#1** major appliance manufacturer in the world

7 brands each generate more than $1 billion in annual sales*

*Whirlpool, KitchenAid, Embraco, Consul, Maytag, Brastemp, Indesit brands

**Whirlpool ownership of the Hotpoint brand in EMEA and Asia Pacific region is not affiliated with Hotpoint brands sold in the Americas.
**GROWTH IN EMEA**

Our innovative products, margin expansion and growth opportunities in the emerging Middle East, African and Eastern European countries position our Whirlpool EMEA business for ongoing value creation as the region’s economy recovers. We also have distinct advantages with the acquisition of the Indesit Company, allowing us to double our scale with minimal overlap. Indesit’s winning country, product and brand portfolio are extremely complementary to ours, helping us to increase our business – quickly.

We expect the integration to deliver at least $350 million in benefits by 2017. We will create synergies through procurement and our product and operating platforms, but our real opportunity is to increase our country coverage while offering complementary brands and products to consumers throughout the EMEA region.

Another key advantage of this acquisition is enhanced product leadership. Indesit has strength in combination washer/dryers, front-load washers, cooking ranges and a number of refrigerator platforms. Whirlpool is the leader in built-in cooking, microwave ovens, top-load washers, refrigeration and small appliances. When you combine these businesses and add our global product innovation abilities, you have a very strong product leadership story throughout Europe.

In 2015, we will work through the integration in Europe, making progress on the synergies in procurement and operations, while taking advantage of our newly increased scale and enhanced product leadership. In addition, we will look to opportunities in Eastern Europe, Africa and the Middle East, where there is a large population with low appliance penetration. I am confident 2015 will be a year of significant growth throughout the region.

---

**GROWTH IN ASIA**

There are tremendous growth opportunities for Whirlpool Corporation in the Asia region, in particular in India and China. Our presence in India is already strong; therefore, we are building on this by offering consumers at all economic levels new, innovative products that deliver to their needs and desires.

The acquisition of Hefei Sanyo allows us to quadruple our platform in China by bringing increased distribution, new manufacturing and service centers, and reaching more consumers in the market. We see the incredible opportunity in both markets because each has a growing middle-class population, many of whom are first-time buyers of appliances looking for new, innovative products that give them a better quality of life.

Hefei Sanyo is a healthy company that has consistently delivered strong operating margins. They have produced primarily washers and recently added refrigerators and microwave ovens and are entering into other product categories. They have a strong manufacturing base with three factories and have ample capacity to enable growth. Hefei Sanyo has more than 30,000 distribution outlets across China in both rural areas and major cities, which is more than 10 times the outlet’s Whirlpool had previously. Their brands are known and trusted in China and are complementary to the Whirlpool brand, and since the acquisition we have already launched our first wave of new product offerings into the market.

Finally, yet very importantly, Hefei Sanyo has a proven strong and capable management team that is eager to be a part of the Whirlpool team. These strong attributes, coupled with Whirlpool’s global technology, global footprint and management experience creates a very strong platform for profitable growth in China.

We are excited about our potential for growth in Asia and in 2015 we will begin to take advantage of this opportunity. The addition of Hefei Sanyo, continued investments in product innovation, expansion into new categories, continued increase in the distribution of our products and brands while leveraging our global scale and product platforms, gives us confidence in our ability to grow in Asia.

Our day-to-day connection with our consumers is through our appliances. We strive to offer the most preferred product with the best design, quality and cost. We work to achieve this every day by producing innovative, iconic products.

**Product Leadership**

Key to being a global power in innovation for the home is an attentiveness to the lives and needs of our consumers throughout the world. Beautifully crafted KitchenAid brand appliances for Europe and North America exemplify this symphonic blend of consumer cooking needs and Whirlpool Corporation solutions.
Whirlpool Corporation innovates to make people’s lives better. Consumers were looking for a way to care for their clothing between washes. The SWASH™ system, an all-in-one express clothing care system that helps remove light wrinkles, freshens, neutralizes odor and restores the fit that’s lost to wear in just ten minutes, was introduced in the United States.

The SWASH™ system is a unique solution developed in collaboration with Procter & Gamble using proprietary innovative technologies that enhance and customize the user experience.
Refrigeration Innovation

**Jenn-Air brand Obsidian Interior**

Dramatically illuminated with innovative LED technology and the industry’s first premium obsidian interior — refrigeration has been elevated to a new level. With soft close drawers and metallic finishes, Jenn-Air brand brings a luxurious element to refrigeration in North America.
Laundry Innovation

The company that invented the first electric wringer washer 103 years ago continues to redefine the laundry process for consumers all around the world. The top of the line washers and dryers from Whirlpool brand revolutionize the process of doing laundry. In the Cabrio pair from North America, instinctive consoles allow users to select “what” they need to wash or dry and then “how” they want to accomplish it—a industry first. From the essential cleaning of the light and portable Ace line to the versatile premium options of the Bloom Wash washer, Whirlpool India delivers products for every economic level.
Brastemp B.blend
The first all-in-one multi-drink dispenser changes the way our Latin American consumers enjoy beverages, with 23 types of drinks — carbonated or non-carbonated, cold or hot.*

*Dispensing system in partnership with Bevyz

Consul Beer Cooler
An unprecedented product launch that drove sales levels to more than six times the original projections in the first year. It chills beer to the perfect temperature for Brazilian consumers — just above freezing — and ends their frustration with juggling beers between freezer and refrigerator.

Refreshing Innovation
Incredible Latin America launches feature must-have beverage innovations that resonate with consumers looking for a better way to unwind. Whether it's a piping hot cup of coffee or an icy cold beverage, Whirlpool Latin America offers innovative solutions to make consumers’ lives easier.
Breakthrough Advertising Campaign

Every meal you cook, every dish you wash, every shirt you clean — that’s caring. And every act of care you give helps the people you love become people who love. That’s why at Whirlpool, we believe that helping you care for the ones you love is the most important thing we can do.

The Whirlpool brand’s United States campaign, Every day, care, launched in fall with amazing feedback from retailers, consumers, employees and the media.
Knowing its consumers well helps KitchenAid bring useful and desirable innovation into new spaces in the kitchen. The magnetic drive Torrent blender, the Nespresso® by KitchenAid® coffee machine and the Sparkling Beverage Maker powered by SodaStream® highlighted a year of 13 new product launches in the small appliance category alone. Led by the iconic stand mixer, KitchenAid small appliances experienced so much growth, a 200,000 square foot expansion of the Greenville, Ohio plant was announced, adding 400 new jobs when it opens.
Garage Innovation

PrimeTime Lockers

Gladiator Garageworks, a leader in garage storage and organization, has expanded its line of quality storage solutions. Tapping into the passion of college sports fans throughout the United States, Gladiator brand consumers can now show their true colors in their garages and beyond.
Whirlpool Corporation delivers products its consumers crave, like Hotpoint brand kitchen appliances in the U.K. Hotpoint consumers want to have full control in their homes and rely on appliances to improve their lives. By offering outstanding results and fulfilling experiences, Whirlpool Corporation helps get them there.

*Whirlpool Corporation ownership of Hotpoint brand in EMEA and Asia Pacific regions is not affiliated with the Hotpoint brand sold in the Americas.

**Expanding Our Brand Portfolio**

Whirlpool Corporation welcomed several new brands through the Indesit and Hefei Sanyo acquisitions. These brands are strong and trusted, complementing our portfolio. The products offered from these brands are boosting the bottom line while bringing Whirlpool Corporation into new homes.

---

**Diqua Laundry**

Incredible new washing and drying combination machines in China under the Diqua brand provide innovative Fuzzy Logic Smart Cycles for the best laundry care, as well as convenience through a high-speed direct-drive inverter motor. This touch-screen model is making waves with the Chinese consumers.

**Diqua Refrigerator**

The combination of European styling and an innovative inverter compressor in this three-door refrigerator offers exceptional aesthetics, best-in-class preservation and an adjustable temperature zone drawer to meet consumers’ storage needs.

---

**Hotpoint* Cooker**

Whirlpool Corporation delivers products its consumers crave, like Hotpoint brand kitchen appliances in the U.K. Hotpoint consumers want to have full control in their homes and rely on appliances to improve their lives. By offering outstanding results and fulfilling experiences, Whirlpool Corporation helps get them there.

*Whirlpool Corporation ownership of Hotpoint brand in EMEA and Asia Pacific regions is not affiliated with the Hotpoint brand sold in the Americas.
Operating Excellence

With a mission of creating demand and earning trust every day, it is important to us that we do things the right way — with excellence in innovation, quality and speed. This is how we maintain the confidence of our current consumers and attract new consumers to our products. We are continuously improving our global best-practice capabilities, processes and tools to drive productivity and cost reduction while allowing us to innovate faster and deliver the best products.

Operating excellence builds on these best practices and drives them across our entire organization — from manufacturing to purchasing, from engineering to aesthetic design. We constantly seek new ways of working smarter and creating a competitive advantage that sets the stage for accelerated growth.
Through innovative approaches to product development, we’ve engaged our employees in new and impassioned ways, like our SPARK Competition. This employee-based business case challenge is our way of encouraging and rewarding innovation among all of our people while also helping us pursue the best and brightest ideas generated by them. It’s paying off in new consumer solutions.

Our dynamic and engaging culture encourages our employees to continually provide input into how we run the company. Our leadership embraces this input. The result is a best-in-class organization built by people from every level.

Our vision and work environment are conducive to success, but the minds and hearts of those who make up our organization bring our dynamic products to life.

We have assembled a global team of exceptionally talented people who reflect our diverse consumer base. People have always been our greatest asset and our ultimate differentiator—our X Factor. As we unleash individual and collective talents within our winning culture, employees feel empowered to do their best work. You might even say that our greatest product is our people.

We’ve become industry leaders by attracting, developing and retaining talented people who believe improving lives and making a difference matters.

In 2014, Whirlpool Corporation introduced our Winning Workplace in every region. This program is how we empower, enable and inspire our people with the best culture, environment and tools to deliver results beyond expectations. Winning Workplace focuses on a collaborative and transparent environment that fosters faster results and a workforce enabled to work the way they live.
WE ARE COMMITTED TO
Maintaining Strong Connections in Our Communities

We are passionate about making products that make life easier, so people can spend time doing what really matters — being with family and friends.

This commitment leads us to maintain strong connections with the communities where we do business. We believe great communities are the foundation of great business. As a result, we work with other organizations to create better communities. In striving to create a collective impact, we first focus on the social safety net to support the health and wellness of area residents, we then help to provide safe and affordable housing and promote youth development and education.

This approach allows us to prioritize partnerships where we can track results and leverage our funding for maximum impact. Our signature charities include United Way®, Cook for the Cure®, Habitat for Humanity®, the Boys & Girls Clubs of America®, Trees for the Future and Instituto Consulado da Mulher®.

Consul brand continues to empower women in Brazil with its Instituto Consulado da Mulher (Women’s Consulate Institute), offering resources, appliances, and classes to success-bound members of low income communities.

In a similar way, Maytag brand continues to support the Boys & Girls Clubs of America®, organizing an annual Day of Dependability for Whirlpool Corporation employees who join together to make a difference for youth.

Expanding on our longstanding global commitment to Habitat for Humanity, Whirlpool Mexico completed their first build, helping to provide affordable housing to low-income families in their community.

The ReNEWW House project began in April 2014 and will provide the foundation for developing super-efficient, connected appliances of the future. Appliances and showers to provide water for other uses in the house, like toilet flushing. Net-zero energy means that energy production equals energy consumption over the course of a year. Throughout the next three years, participants in the Whirlpool Engineering Rotational Leadership Development program and who are enrolled in the graduate program at Purdue University will have the option to live and work in the house, creating a unique learning experience. The home also has a Gladiator brand finished basement that doubles as a laboratory. Engineers installed an instrumentation system that monitors key data to help develop a next-generation, high-efficiency appliance suite in conjunction with Purdue University.

The goal of the project is to learn more about resource sustainability, as well as demonstrate how any home can become resource efficient when the right kind of modifications are made. After this valuable research is complete, the results will be shared with homebuilders and remodelers interested in the benefits of sustainable building. The project will also provide valuable insights to Whirlpool Corporation engineers for future product design. Involvement in the ReNEWW House is a continuation of the sustainability efforts that take place every day at Whirlpool Corporation, reflecting the company's efforts to conserve water, reduce energy consumption, reduce carbon intensity and minimize or eliminate waste.

Like our purposeful innovation, we focus on sustainability initiatives that matter. An energy inefficient, late 1920s vintage bungalow in West Lafayette, Ind., became a living laboratory for appliance and resource efficiency research, thanks to a combined effort by Whirlpool Corporation and Purdue University.

As part of our corporate commitments to sustainability and advancements in the homebuilding and remodeling industries, Whirlpool Corporation engineers are working with Purdue University to be the first to transform an existing home into a net-zero energy, water and waste structure. Called the ReNEWW House — for Retrofitted Net-zero Energy, Water and Waste — the structure is being renovated to include energy-saving features, solar panels and a gray water system that reuses water from appliances and showers to provide water for other uses in the house, like toilet flushing. Net-zero energy means that energy production equals energy consumption over the course of a year.

For the full-year 2015, we expect to generate free cash flow between $700 and $800 million, including restructuring cash outflows of up to $250 million, capital spending of $800 to $850 million and U.S. pension contributions of approximately $80 million.  

The projections above are based on many estimates and are inherently subject to change based on future decisions made by management and the Board of Directors of Whirlpool, and significant economic, competitive and other uncertainties and contingencies.  

The table below reconciles projected 2015 and targeted 2018 cash provided by operating activities determined in accordance with GAAP to free cash flow, a non-GAAP measure. Management believes that free cash flow provides stockholders with a relevant measure of liquidity and a useful basis for assessing Whirlpool’s ability to fund its activities and obligations. There are limitations to using non-GAAP financial measures, including the difficulty associated with comparing companies that use similarly named non-GAAP measures whose calculations may differ from our calculations. We define free cash flow as cash provided by continuing operations less capital expenditures and including proceeds from the sale of assets, businesses, and changes in restricted cash. The change in restricted cash relates to the private placement funds paid by Whirlpool to acquire majority control of Hefei Sanyo and which are used to fund capital and technical resources to enhance Hefei Sanyo’s research and development and working capital.  

**Ongoing Business Operations Measures: Operating Profit and Earnings per Diluted Share**  

The reconciliation provided below reconciles the non-GAAP financial measures, ongoing business operating profit and ongoing business earnings per diluted share, with the most directly comparable GAAP financial measures, reported operating profit and earnings per diluted share available to Whirlpool, for the twelve months ended December 31, 2014, December 31, 2013, and December 31, 2012. Ongoing business operating profit margin is calculated by dividing ongoing business operating profit by adjusted net sales. Ongoing business net sales excludes Brazilian [BEFIIX] tax credits from reported net sales. For more information, see document titled “GAAP Reconciliations” at investors.whirlpoolcorp.com/annuals.cfm.

FREE CASH FLOW
As defined by the company, free cash flow is cash provided by operating activities after capital expenditures, proceeds from the sale of assets and businesses and changes in restricted cash. The reconciliation provided below reconciles twelve-month 2014, 2013 and 2012 full-year free cash flow with cash provided by operating activities, the most directly comparable GAAP financial measure. The change in restricted cash relates to the private placement funds paid by Whirlpool to acquire a majority control of Hefei Sanyo and which are used to fund capital and technical resources to enhance Hefei Sanyo’s research and development and working capital.

FORWARD-LOOKING STATEMENTS
The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements made by us or on our behalf. Certain statements contained in this annual report, including those within the forward-looking perspective section within this Management’s Discussion and Analysis, and other written and oral statements made from time to time by us or on our behalf do not relate strictly to historical or current facts and may contain forward-looking statements that reflect our current views with respect to future events and financial performance. As such, they are considered “forward-looking statements” which provide current expectations or forecasts of future events. Such statements can be identified by the use of terminology such as “may,” “could,” “will,” “should,” “possible,” “plan,” “predict,” “forecast,” “potential,” “anticipate,” “estimate,” “expect,” “project,” “intend,” “believe,” “may impact,” “on track,” and similar words or expressions. Our forward-looking statements generally relate to our growth strategies, financial results, product development, and sales efforts. These forward-looking statements should be considered with the understanding that such statements involve a variety of risks and uncertainties, known and unknown, and may be affected by inaccurate assumptions. Consequently, no forward-looking statement can be guaranteed and actual results may vary materially.

This document contains forward-looking statements about Whirlpool Corporation and its consolidated subsidiaries (“Whirlpool”) that speak only as of this date. Whirlpool disclaims any obligation to update these statements. Forward-looking statements in this document may not be all inclusive, but are not limited to, statements regarding expected earnings per share, cash flow, productivity and raw material prices. Many risks, contingencies and uncertainties could cause actual results to differ materially from Whirlpool’s forward-looking statements.

Among these factors are: [1] intense competition in the home appliance industry reflecting the impact of both new and established global competitors, including Asian and European manufacturers; [2] acquisition and investment-related risk, including risk associated with our acquisitions of Hefei Sanyo and Indesit, and risk associated with our increased presence in emerging markets; [3] Whirlpool’s ability to continue its relationship with significant trade customers and the ability of these trade customers to maintain or increase market share; [4] risks related to our international operations, including changes in foreign regulations, regulatory compliance and disruptions arising from natural disasters or terrorist attacks; [5] fluctuations in the cost of key materials (including steel, plastic, resins, copper and aluminum) and components and the ability of Whirlpool to offset cost increases; [6] the ability of Whirlpool to manage foreign currency fluctuations; [7] litigation, tax, and legal compliance risk and costs, especially costs which may be materially different from the amount we expect to incur or have accrued for; [8] the effects and costs of governmental investigations or related actions by third parties; [9] changes in the legal and regulatory environment including environmental and health and safety regulations; [10] Whirlpool’s ability to maintain its reputation and brand image; [11] the ability of Whirlpool to achieve its business plans, productivity improvements, cost control, price increases, leveraging of its global operating platform, and acceleration of the rate of innovation; [12] information technology system failures and data security breaches; [13] product liability and product recall costs; [14] inventory and other asset risk; [15] changes in economic conditions which affect demand for our products, including the strength of the building industry and the level of interest rates; [16] the ability of suppliers of critical parts, components and manufacturing equipment to deliver sufficient quantities to Whirlpool in a timely and cost-effective manner; [17] the uncertain global economy; [18] our ability to attract, develop and retain executives and other qualified employees; [19] the impact of labor relations; [20] Whirlpool’s ability to obtain and protect intellectual property rights; and [21] health care cost trends, regulatory changes and variations between results and estimates that could increase future funding obligations for pension and post-retirement benefit plans.

We undertake no obligation to update any forward-looking statement, and investors are advised to review disclosures in our filings with the SEC. It is not possible to foresee or identify all factors that could cause actual results to differ from expected or historical results. Therefore, investors should not consider the foregoing factors to be an exhaustive statement of all risks, uncertainties, or factors that could potentially cause actual results to differ from forward-looking statements.

Additional information concerning these and other factors can be found in Whirlpool Corporation’s filings with the Securities and Exchange Commission, including the most recent annual report on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K.

TOTAL RETURN TO SHAREHOLDERS

Report by Management on the Consolidated Financial Statements

The management of Whirlpool Corporation has prepared the accompanying financial statements. The financial statements have been audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, based upon their audits, expresses the opinion that these financial statements present fairly the consolidated financial position, statements of income and cash flows of Whirlpool and its subsidiaries in accordance with accounting principles generally accepted in the United States. Their audits are conducted in conformity with the auditing standards of the Public Company Accounting Oversight Board (United States).

The financial statements were prepared from the Company’s accounting records, books and accounts which, in reasonable detail, accurately and fairly reflect all material transactions. The Company maintains a system of internal controls designed to provide reasonable assurance that the Company’s books and records, and the Company’s assets are maintained and accounted for, in accordance with management’s authorizations. The Company’s accounting records, compliance with policies and internal controls are regularly reviewed by an internal audit staff.

The audit committee of the Board of Directors of the Company is composed of five independent directors who, in the opinion of the board, meet the relevant financial experience, literacy, and expertise requirements. The audit committee provides independent and objective oversight of the Company’s accounting functions and internal controls and monitors (1) the objectivity of the Company’s financial statements, (2) the Company’s compliance with legal and regulatory requirements, (3) the independent registered public accounting firm’s qualifications and independence, and (4) the performance of the Company’s internal audit function and independent registered public accounting firm. In performing these functions, the committee has the responsibility to review and discuss the annual audited financial statements and quarterly financial statements and related reports with management and the independent registered public accounting firm, including the Company’s disclosures under “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” to monitor the adequacy of financial disclosure. The committee also has the responsibility to retain and terminate the Company’s independent registered public accounting firm and exercise the committee’s sole authority to review and approve all audit engagement fees and terms and pre-approve the nature, extent, and cost of all non-audit services provided by the independent registered public accounting firm.

Larry M. Venturelli
Executive Vice President and Chief Financial Officer

Management’s Report on Internal Control Over Financial Reporting

The management of Whirlpool Corporation is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a–15(f) and 15d–15(f) under the Securities Exchange Act of 1934. Whirlpool’s internal control system is designed to provide reasonable assurance to Whirlpool’s management and board of directors regarding the reliability of financial reporting and the preparation and fair presentation of published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. The management of Whirlpool assessed the effectiveness of Whirlpool’s internal control over financial reporting as of December 31, 2014. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework (2013 Framework). Based on the assessment and those criteria, management believes that Whirlpool maintained effective internal control over financial reporting as of December 31, 2014.

Management’s assessment of internal control over financial reporting as of December 31, 2014 excludes the internal control over financial reporting related to Hefei Rongshida Sanyo Electric Co., Ltd. (“Hefei Sanyo”) and Indesit Company S.p.A. (“Indesit”) both acquired in the fourth quarter of 2014, which are included in the 2014 consolidated financial statements of Whirlpool Corporation. As of December 31, 2014, Hefei Sanyo and Indesit together constitute $5.6 billion and $2.9 billion of total and net assets, respectively. Additionally, they represent net sales and net earnings of $979 million and $15 million, respectively, which exclude certain non-recurring acquisition-related costs and investment expenses.

Whirlpool’s independent registered public accounting firm has issued an audit report on its assessment of Whirlpool’s internal control over financial reporting. This report appears on page 47.

Report of Independent Registered Public Accounting Firm

The Stockholders and Board of Directors

Whirlpool Corporation

We have audited Whirlpool Corporation’s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control—Integrated Framework (2013 Framework) issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Whirlpool Corporation’s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management’s Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management’s Report on Internal Control Over Financial Reporting, management’s assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of the acquired Hefei Rongshida Sanyo Electric Co., Ltd. (“Hefei Sanyo”) or Indesit Company S.p.A. (“Indesit”) business or the acquired Indesit Company S.p.A. (“Indesit”) business which are included in the 2014 consolidated financial statements of Whirlpool Corporation and Hefei Sanyo and Indesit constituted $5.6 billion and $2.9 billion of total and net assets, respectively, as of December 31, 2014 and as of December 31, 2014, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework), and our report dated February 26, 2015 expressed an unqualified opinion thereon.
